EDUCATION

- **Open University**, Physics B.Sc
06\2023 - Present
- **Sela**, Software Developer
(Tech Warriors - 8200)
03\2022 - 02\2023
- **Ort Zimbaum**, Engineering
Sciences Program 2012-2017

KEY COMPETENCIES

- **Tools:** VS/Code, Git, aws, Docker, RabbitMQ, elk, vault, SonarQube, Snyk, Excel
- **Programming:** C#, TypeScript, js, python, java, SQL

LANGUAGES

- Hebrew - Native
- Russian - Native
- English - Fluent
- Japanese - Basics

VOLUNTEERING

- Rescue unit
- Choosing Friday - Teaching kids computer science

CERTIFICATIONS

- Software Developer - [Sela](#)
- Commendation at the Young Engineer Conference [Technion](#)
- C# Unity Game Developer - [Udemy](#)
- AWS Cloud Practitioner certificate
- [Army Officer Commander](#)

MILITARY SERVICE

- Reserve - Air support officer in the cooperation unit 5620
- **Deputy Company Commander** at Division 7 (03\2018 - 03\2022)

WORK EXPERIENCE

Backend Developer at [Abra R&D \(Devalore\)](#) (03/2022 – Present)

I have played a pivotal role within a dynamic and collaborative team. Working in a fast-paced environment, I assumed multiple responsibilities and participated to the success of numerous projects.

Key Achievements and Responsibilities:

- Contributed to the development of **over 10** production systems, each with distinct requirements and objectives, ranging from e-commerce platforms to internal use apps with .NET:
 - Engineered CMS and Campaigns backend applications, integrating **DynamoDB, S3, SQS, Lambdas**, and more.
 - Constructed a sturdy server-side application using the .NET framework, integrated with multiple databases including **PostgreSQL** and **AS400**, employing stored procedures for efficient data handling. Anticipated scalability to accommodate a wide user base, projected to reach thousands of users.
- Demonstrated versatility in utilizing a variety of modern backend technologies, including popular frameworks such as **.NET Core, Node with Typescript, AWS** serverless computing services and more.
- Implemented **RabbitMQ** for efficient message handling and effectively utilized it alongside **SignalR** to enhance responsiveness and user engagement through real-time communication across applications.
- Leveraged **ELK** stack for centralized logging and monitoring, ensuring efficient management and troubleshooting of applications.
- Skilled in multiple architectural styles, including **microservices** and **monolithic** architectures, with a proven track record of designing and implementing effective software solutions.
- Excel in **CI/CD** methodologies, creating automated pipelines that facilitate smooth integration, rigorous testing with tools like **SonarQube** and **Snyk**, and efficient deployment using **Docker** for scalable applications.
- Adept at both designing new projects and maintaining existing ones, with a focus on enhancing performance and efficiency.
- Proficient in direct customer communication, adept at understanding requirements from inception to execution, and skilled in resolving any issues that arise.
- Efficiently managed a group of developers by assigning tasks based on individual strengths and project priorities. I provided clear guidelines and documentation to ensure alignment with project goals.

PERSONAL PROJECT

Dexcelerate - Trading Cryptocurrencies (05/2021 – 03/2023)

- State-of-the-art trading platform powered by blockchain technology - designed for professional traders seeking maximum speed and reliability. [[Site](#), [Community](#)]
- **Programing Technologies:** goLang, js, Remix, aws, Jest, lightweight.
